IHAR SADOUNIKAU

Barcelona, Spain | P: +34615523322 | isadounikau@gmail.com

12 years experience in tech leadership

Ikigai Digital Tech Engineering Manager — 06.2025 — present

- Reshaping digital banking with AI
- Built AI powered expert team
- Full scale launch of banking operation platform within one year with only 4 engineers
- Created entire e2e solution with on-premise requirements

N26 Tech Lead/Engineering Manager — 05.2021 — 06.2025

- Helped team to build solid delivery processes, the stability of cluster increased by 60%
- Managed teams during monolith migration to SOA
- Decreased Salesforce to Braze migration from two years to half a year by reshaping teams collaboration and technical migration vision
- Grow engineers to the next level with mentorship and motivation

Free-Now (ex Mytaxi) Tech Lead Engineer (Spring, AWS, Kafka, Postgresql) — 04.2018 — 05.2021

- Leading the backend chapter through the hypergrowth stage at the company
  Department grew from 2 backend engineers to over 30 engineers in one year
- Designed the #1 document management system at the London ride hailing market
  Was able to optimise the flow from 48 hours to only 2
- Responsible for the flexible/configurable driver's registration system

EPAM Systems Lead Software Engineer (Spring, Azure, RabitMQ, MySQL) — 08.2017 — 04.2018

- Designed system architecture from scratch for a new company client

Qulix Systems Senior Software Engineer (Spring, WebRTC, IoT, MySQL) — 01.2017 — 08.2017

- Built a scalable and reliable cloud solution for IoT systems
- Optimised cross-component transport protocol, the connection downtime decreased from 40 seconds to dozen milliseconds between a client application and embedded smart home system

NEKLO LLC Software Engineer — 06.2014 — 01.2017

- Helped company to build BigData system in Hadoop environment

Education

Belarusian State University of Informatics and Radioelectronics — 2016 — 2018
Minsk – master of computer science
Cloud computing and virtualization technologies

Belarusian State University of Informatics and Radioelectronics — 2011 — 2016
Minsk – bachelor degree
Information systems and technologies

Activities

- Proactive mentor in the biggest Kotlin engineering community
- Writes articles about system processes and software engineering
- Contributes to open source projects https://github.com/isadounikau

Additional

Skills Team Management, Solution Architecture, Product Engineering, AI, Agile, Roadmap management, Delivery leadership, On premise, Java, Kotlin, Spring, Spring-Boot, JPA, SQL, Hibernate, JOOQ, Angular, Concurrency, Kafka, RabbitMQ, MySQL, PostgreSQL, MongoDB, HBase, Amazon Web Services, Azure, Microservices, Agile, Git, Terraform, Continuous Integration, Continuous Deployment
